

SECURITY FOR SOCIETY ○●○○

POLITECNICO
MILANO 1863

31.03.2021

WEBINAR

WATER SECURITY

Water availability represents a fundamental right of the mankind, at present severely threatened by harmful human actions and climate changes. Different scenarios and management tools for a worldwide sustainable development are presented in this session.

PROGRAM

FROM 9 AM TO 11 AM CEST

Chairperson: **M. Riva**, Politecnico di Milano

D. Bocchiola, Politecnico di Milano

Water management in high altitude, melt driven catchments in the era of climate change: theory and examples from Europe and central Asia

K. Duskaev, Al-Farabi Kazakh National University

Climate change impacts on water resources management in Kazakhstan

C. Corbari, Politecnico di Milano

Water and food security: the role of smart irrigation modelling and monitoring

M.M. Afifi, Benha University

Water resources management in Egypt: assessment and recommendation

M.A. Brovelli, Politecnico di Milano

Ensure availability and sustainability of water for all: SIMILE, a geospatial enabler of a sustainable development goal
