

AUTOMATION WEEK 2021

20-21 September: Training Days

22-23 September: Automation Instrumentation Summit

24-25 September: DLC District Leader Council

The Automation Instrumentation Summit, represents the international meeting point between the main players in the sector that provide a timely analysis of the industrial market and a 360-degree view on the technological solutions currently available in the industry 4.0. A unique platform to meet customers and partners and to develop new opportunities.

AUTOMATION WEEK 2021

This year Summit will be held in virtual mode due to the continued Covid19 pandemic bringing together Industry, Academia, and International Automations Professionals

This event features technical sessions, training, and workshops to prelude technologies and solutions that will overcome challenges and increase opportunities.

The event is soliciting papers for presentation in the technical sessions based on the four focused tracks listed below.

Submission deadline July 30, 2021

Also, sponsorships and virtual exhibits are welcome.

Technical Tracks –Abstract Submission by July 30, 2021

Green energy and decarbonization. Technological evolution required by instrumentation, control and protection systems for the transition from current GAS/LNG plants to Hydrogen production, transport and distribution facilities.

Safety – Safety Instrumented System (SIS), best practices to increase safety system, assurance level, workforce skills and talent development for higher reliability.

Cybersecurity – ICS Cybersecurity Standards, Risk Management, Supply Chain, Best practices, Maturity challenges, Talents development, and Cyber-Attack Use Cases.

Smart Manufacturing - Industrial internet of things (IIoT), Artificial Intelligence (AI), Virtual Reality (VR), Augmented Reality (AR), Predictive Maintenance (Analytics), platform intelligence & integration, Telecoms 5G.
